See the "From our Members" section below for some more recent user submitted content. MANAGED FOREST To all members:- Discussion took place at the May general meeting about changing the description of section 119 to a "Managed Forest." The Executive have been working on this for some time and the main advantage of this change would be to lower our taxes. However, the cost for this change is high but could be paid for in a few years with tax savings. The Executive are requesting the attendance of as many members possible at the June 19th meeting to vote on this change.
