NUTS IN MAY-TEMBER ROAD RIDE— Sept. 6th - by Graham Turner

A point was given for each km off at each check. Tenths needed to be calculated as the accuracy was quite impressive. A point was given for an incorrect answer to one of those aforementioned questions, and a highly secretive point system was devised by my team of accountants for guesses at the number of nuts in the jar. The bribes (thanks for those) were obviously factored in also !
